

TS3-EP BAGSEALER

Select Bag Sealers Ltd produces a manual tape bag sealer for a wide range of products and industries. Predominantly designed for the Bakery industry the TS3-EP can also be applied to the Fruit and Vegetable produce market and both the chilled and frozen meat industry.

The easy open tape seal makes it ideal for customers that need the bag to be opened several times and re-sealed in order to maintain freshness of product. The electronic printer allows essential point of tie information such as

trace-ability codes, best before dates, product prices, etc to be printed during the sealing procedure, removing the requirement for addition labels to be applied.

Easy to open and reseal.

Features and Benefits

- ✓ Safe and secure sealing of plastic and paper bags
- ✓ Re-useable, clearly printed, easy open seal
- ✓ The electronic thermal printer enables self chronologically updating print formats to be printed on the seal, maintaining high quality print with both bold and light text.
- ✓ Easy-seals can be supplied in a wide range of colours.
- ✓ Low maintenance design with all components easily accessible
- ✓ Optional neck trimmer available

“Over the past 20 years we have perfected the art of tape bag sealing and are now keen to share our expertise globally”

Simon Browning MD

TS3-EP BAGSEALER

Easy-seals are...
